

Capital-Intensive Program & Portfolio Advisory

Transforming complex portfolios into predictable, high-value outcomes.

Who We Are

Pothee Consultants is a **next-generation advisory firm** specializing in **capital-intensive programs and portfolios**, with a strong emphasis on **optimizing cost and schedule** while **mitigating risk**. We help clients plan, govern, and deliver large, high-value programs with greater precision, predictability, and performance.

By **integrating engineering expertise, program management rigor, and digital intelligence**, we deliver measurable outcomes across time, cost, and quality, while mitigating risks inherent to complex investments.

Our team blends decades of experience with execution excellence and digital fluency, ensuring projects are **planned well, executed right, and delivered efficiently**.

Vision

Redefining the future of capital-intensive projects through technology, precision, and performance.

Mission

To empower organizations with integrated program management, engineering excellence, and digital intelligence, delivering predictable, high-value outcomes for complex portfolios.

Our Distinct Edge

- ✓ Technology-Driven Project Management
- ✓ Execution-Backed Advisory
- ✓ Data-Led Decision Making
- ✓ Design-to-Delivery Integration
- ✓ Agile & Scalable Engagements

The Challenge We Solve

Capital-intensive projects tend to face significant challenges, including governance issues, delays in timely decision-making, operating in silos, poor visibility due to lack of information systems, complex stakeholders, and improper planning.

We help programs succeed by:

Predictability

Robust planning and PMO discipline

Transparency

Real-time digital dashboards and integrated controls

Accountability

Structured governance and reporting

Efficiency

Design optimization and risk-focused execution

Value Creation

Actionable insights that improve cost, schedule, and performance

01

Program Management

Driving governance and predictability in capital-intensive programs

- **Governance & Oversight**
Structured governance that enables transparency and facilitates timely decision-making
- **Maturity & Risk Assessment**
Benchmarking processes to identify gaps, risks, and improvement opportunities
- **Performance Monitoring**
Tracking schedule, cost, and cash flow to maintain project control
- **Forecasting & Optimization**
Data-driven forecasting to optimize timelines, costs, and resource utilization
- **Contract & Claims Management**
Supporting claims, delay analysis, and contract risk mitigation.
- **Assurance & Compliance Reviews**
Independent reviews ensure quality, compliance, and governance adherence

Ensuring constructible, efficient, and optimized project designs

- **Feasibility & Concept Development**
Project viability, concept layouts, techno-commercial evaluation
- **Front-End Engineering Design (FEED)**
Design criteria, CAPEX estimation, and multi-disciplinary coordination
- **Detailed Design & Constructability**
Construction-ready drawings, BOQs, specifications, and methods planning
- **Value Engineering & Optimization**
Cost-effective design alternatives and efficiency improvements
- **Technical Assurance & Documentation**
Design validation, peer review, as-built documentation, and knowledge transfer

02

Engineering Services

Data-driven insights for proactive and predictive decision-making

- **Digital Monitoring & Dashboards**
Real-time visibility into project performance, progress, and costs
- **Automation & Data Analytics**
Advanced analytics to improve decisions and eliminate manual reporting
- **BIM & Collaborative Platforms**
Digital collaboration is improving coordination across project stakeholders
- **Integrated Procurement Systems**
Digitized procurement enhances transparency, efficiency, and lead-time control
- **Technology-Driven Transformation**
Embedding digital tools across workflows for performance improvement
- **Digital Capability Building**
Enabling teams to adopt and sustain digital project delivery practices
